# MAKE AN ORIGAMI BUTTERFLY

**1**

Start with a square of paper. Fold in half both ways, then open it out.

**2**

Fold the sheet diagonally in the other direction and open.
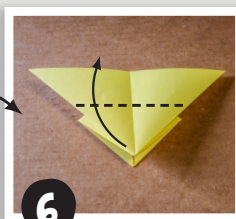

**3**

The creases should create a concertina. Bring the two sides in.

**4**

The paper should collapse down into a triangle shape.

**5**

Using only the top flaps, fold both corners of the triangle up to the top.

**6**

Turn it over, then fold up the triangle point so it pokes out over the top.

**7**

Make sure not to flatten the circled folds. Fold the point over behind.

**8**

Turn the paper over so the folded over point is on the top.

**9**

Fold the butterfly in half along the centre line.

**10**

Your now have your butterfly! Why not finish by decorating it?
